

**Single tooth
to full mouth rehabilitations
in 4 hours a week.**

Fellowship in Restorative Dentistry

Fellowship in Restorative Dentistry

Welcome to one of the most comprehensive full-mouth restorative dentistry courses available. This course is designed to give you greater predictability in your restorative dentistry, for less time and cost.

For most dentists, restorative dentistry is our primary income earner. However many dentists are not completely confident with many restorative procedures. Or they find their results unpredictable.

When a procedure doesn't feel predictable, it is rare that we offer it, or do it, in any volume.

The Fellowship in Restorative Dentistry helps you master restorative dentistry from single composites and crowns, all the way to smile make overs and full mouth rehabilitations.

**Learn for
70% less**

**Expert
Educators**

**Just 4 hours
a week**

Learn full-mouth Restorative Excellence, in 4 hours a week.

Learn all aspects of restorative dentistry to a level where you feel confident, your skills are truly competent, and your patient are going to be in safe hands.

Having taught hundreds of dentists to do complex restorative we have developed a training pathway that builds you skills logically.

We have also developed unique hands on training simulations that are so successful, that most dentists pay for the course within a few months with increased production.

The four building block of amazing restorative dentistry are:

1. Posterior Quadrant Dentistry
2. Aesthetic Dentistry
3. Veneers
4. Full Mouth Rehabilitation

At RIPEGLOBAL, we go way beyond giving you a lecture, giving you a demonstration, and having you carry out one crown prep on one tooth before giving you a certificate.

We believe in supporting you 24/7 through our private class community. Giving you direct access to all the educators at any time.

We believe in supporting you through all your first cases.

We believe in building real skills through intense simulation so treating a stressful case becomes easy.

Module 1: Posterior Dentistry

Restorative Fellowship

Starting February 2022

Posterior dentistry is designed to bring competence in all aspects of quadrant multi and single tooth dentistry.

In Posterior Direct unit, you will learn:

- Isolation, preparation and matrixing of posterior composites.
- Posterior composite anatomy.
- Bioclear and injection moulding.
- Deep margin and difficult case management for directs.
- How to critique literature.
- Patient management for long procedures.
- Precise quadrant and treatment planning photography.

Posterior Direct Hands-on

- Intense quadrant of composites gaining perfect preps, matrixing, anatomy and contacts.

In Posterior Indirect unit, you will learn:

- Treatment planning multi tooth and multi material cases.
- Indirect preps, cores, scanning and impressions.
- Vertical preparation techniques.
- Managing occlusion in quadrant dentistry.
- Review of literature regarding endo treatments after indirect.

Posterior Indirect Hands-on

- Crown prep boot camp - prep all types of indirect on 17 teeth in a row until your hand moves effortlessly and your preps are beautiful in very short time frames.

Case Mentoring:

You will be mentored through documenting a case of posterior composites and posterior multi-unit treatment planning and restoration.

Start your journey to Restorative Excellence.

Module 2: Aesthetic Dentistry

Restorative Fellowship

Starting August 2022

Aesthetic dentistry is designed to build on the foundation of restorative taught in posterior, but to add in the detailed aesthetics that become important in the smile region.

In the Aesthetic Direct unit, you will learn:

- Shape of teeth.
- Isolation, matrixing, and restoration with composite.
- Layering anterior composites.
- Bioclear method and injection moulding.
- Stained margins, discoloured teeth, posts.
- Surface texturing.

In the Aesthetic Indirect unit, you will learn:

- Treatment planning indirects.
- Planning including scans, models, photographs, smile designs, 3D mockups.
- Shade matching photography.
- Prep, cores, impressions for anterior crowns and how they differ from posterior.
- Restoring badly damaged teeth and teeth with posts.
- Dealing with dark anterior teeth.

Anterior Direct Hands-on

- Shape of teeth mockup (waxup or smile design done with composite)
- Restore six anterior badly damaged teeth with composite

Anterior Indirect Hands-on

- Prep and core build up anterior teeth in a single session in realistic time frames, correcting common prep errors.

Case Mentoring:

You will be mentored through ideal documentation of anterior composite and anterior ceramic cases.

Start your journey to Restorative Excellence.

Module 3: Veneers

Restorative Fellowship

Starting February 2023

Veneer module is designed to build confidence and understanding with both composite and ceramic veneers.

In the Ceramic Veneers unit, you will learn:

- Longevity of veneers and complications.
- Treatment planning and lab communication for design preoperatively.
- Mockups, informed and financial consent practices.
- Preparation types and choices.
- Ceramic choices.
- Tissue control and impressions.
- Temporising the veneer case - multiple methods.
- Checking, insertion and bonding ceramic veneers.
- Live patient demonstration of insert.

Ceramic Veneers Hands-on

- Multiple Ceramic Veneer preps until you can prep perfectly, and fast!

In the Direct layered Veneers unit, you will learn:

- Planning, smile design, 3D design, mockups, and palatal stents.
- Layered veneers step by step.
- Live patient demonstration.

Case Mentoring:

You will be mentored through composite and ceramic veneers cases.

Direct Layered Veneers Hands-on

- Mockup six anteriors and make a palatal stent
- Layered composite veneers on six anteriors using palatal shell techniques plus premolars.

Start your journey to Restorative Excellence.

Module 4: Full-Mouth Rehab (FMR) Restorative Fellowship

Starting August 2023

Building on the three previous modules, we will now develop competence in a full mouth rehabilitation.

In this Full Mouth Rehab module, you will learn:

- Communication and treatment planning for rehabs.
- Red flags, traps and reasons to NOT do a rehab.
- Occlusal management, planning, maintaining the bit, and increasing vertical dimension.
- Occlusal management for high risk patients with significant bruxism.
- Occlusal design and splint usage for long term success.
- Multi-disciplinary treatment planning including ordering.
- Informed consent and financial consent.
- Preparing a full arch, controlling tissue, and taking impressions and scans.
- Provisionals for the full arch case.
- Cementing and bonding in full arch cases.
- Minimal intervention techniques.
- Rootcanal therapy, implantology, fixed partial dentures in full mouth rehabilitations.

Case Mentoring:

- You will be mentored through planning full mouth cases.
- You will be mentored through at least one full arch case in composite and ceramic.

Hands-on Session

- Prep full upper arch and make temporaries in one session.
- Prep full lower arch and make temporaries the following day.
- Case planning bootcamp - plan difficult cases rapidly and efficiently in volume.

Revolutionary training techniques

Most dentists suffer from stress and anxiety at some point of their career. That's because dental education does not provide enough repetition to build your muscle-memory. You learn the theory at the course. But end up "practicing dentistry" when you get home.

Simulation is key

With RipeGlobal, our curriculum focuses on simulations rather than single tooth hands on.

Think about an air-force pilot, they learn in a simulator so that when they're under stress, their body takes over - that's how we teach.

Our intense cloud hands on classes are designed to be immediately transferable to practice, and to significantly enhance your technical skills, not just teach you practical theory.

We practice together using state-of-the-art manikins and connect across our learning platform - so you can try, and fail and try again, until you can achieve perfect outcomes, in realistic short clinical timeframes.

Our unique methods build skills up to 50% faster than traditional learning in a simlab in person.

Up-skilling with RipeGlobal costs 70% less

Travel, hotels and closing your clinic often cost more than the education itself. RipeGlobal uses revolutionary cloud based simulation training techniques to teach hands on, and it cost a lot less.

Next-level Education

With education, quality should be chosen over cost. However the cost of learning in person can be significant. And let's face it, travel in our covid world can be unpredictable.

Our award winning cloud procedural training system allows you to learn at much lower cost.

You will rarely need to close your practice. And when you do, for a fraction of the time.

The affordability of learning online also makes it easier to significantly up-skill and stay at the top of your career growth.

RipeGlobal reduces education cost by 70% when compared to travelling to a physical facility - and its also better!

We teach with new virtual methods so you learn superior hands-on techniques from master dentists - all from your home or clinic.

Your caring, 24/7 online community

A major benefit of learning online - is that you will be connecting with other practising dentists from all over the world, who will become your own support network.

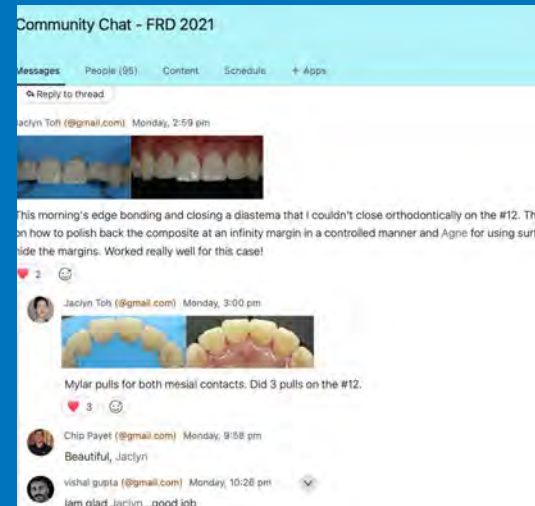

Safe Support Network

At RipeGlobal you connect to a safe and supportive community of dentists - who are also transforming their lives and careers.

For example, last year we taught our course in restorative excellence to 55 students.

These students are still connecting every day, helping each other with cases - and even sharing their weekend outings, supporting each others fitness regimes, and cooking tips.

We're all dentists and we are all in this together. There is a caring community here for you whenever you need it.

RipeGlobal also provides a support network that you will have for life.

Why a call?

Whether you're looking to up-skill and master restorative dentistry, implantology, digital dentistry or treatment planning - our pathway advisors can best guide you, and even setup calls with our educators.

Meet our educators

If you would like to meet our Restorative educators and read their bio, please feel free to [click here](#).

"I liked that I could work with my own instruments, with my own machinery, with my own unit, with my own assistant. That gave me a lot of confidence in what I was doing."

DR STEFANIE HIRT
Switzerland

This is about as close as you can get to doing a live-patient course, the mannequin head is pretty darn realistic and it gives you the opportunity to practise these techniques and skills over and over again."

DR CHARLES PAYET
USA

"So the experience of doing the hands-on course from my office has been one of the biggest benefits. It's been wonderful, not to mention the fact that I don't have to travel and stay in hotels and have all that other stuff."

DR FAUZIA KHAN
USA
